* Distribution to time of day should be based on the time of day courses are offered.

Each fall since 1972, the National Center for Education Statistics has issued early estimates of enrollment in higher education consisting of tabulations of selected items of data for all institutions in the fall enrollment survey. These estimates have been extremely useful for planners within the institutions, State legislatures, Congress, and other interested persons in the higher education community. We ask that you submit the same information again for fall 1978, using this card to transmit the data to the National Center for Education Statistics.

Please complete every item on this card. Refer to the INSTRUCTIONS for definitions and other needed information. Provide final data when possible. Otherwise, if you find it necessary to make estimates, please make a notation to that effect on the card.

When completed, detach the self-addressed, postage-paid half of the card and mail it. Retain the other half for your files.
