TUITION AND FEES AT JOLIET JUNIOR COLLEGE, WITH COMPARISONS

SUMMARY 2009-2010

At \$2,790, JJC tuition and fees are lower than it's peer group, suburban colleges, and national average (see Chart 1).

JJC's tuition increases have been much lower in the last five years than other colleges (see Charts 2 and 3).

JJC's tuition is much lower than the Illinois average for 4-year public (\$9,787) and 4-year private (\$24,623) institutions. By attending JJC for their first two years of college instead of a 4-year public or private college and assuming a student does not receive financial aid, a student can save \$13,994 or \$43,666 respectively (see page 4, Tuition tables).

Tuition is not an accurate indicator of what students actually pay because many students receive financial aid. Net price is calculated as:

$$\text{Net price} = \text{posted tuition and fees} - \text{financial aid received}$$

Research shows if eligible students apply for financial aid, half of the Illinois population will pay nothing for tuition, fees, and books at JJC. Additional research shows that while tuition has increased at a faster pace than inflation, net price for low-income students has not witnessed a significant increase. This suggests that increasing the number of students who receive financial aid could be a more equitable and efficient method of enhancing affordability for low-income students than low tuition (see page 5 and related research).

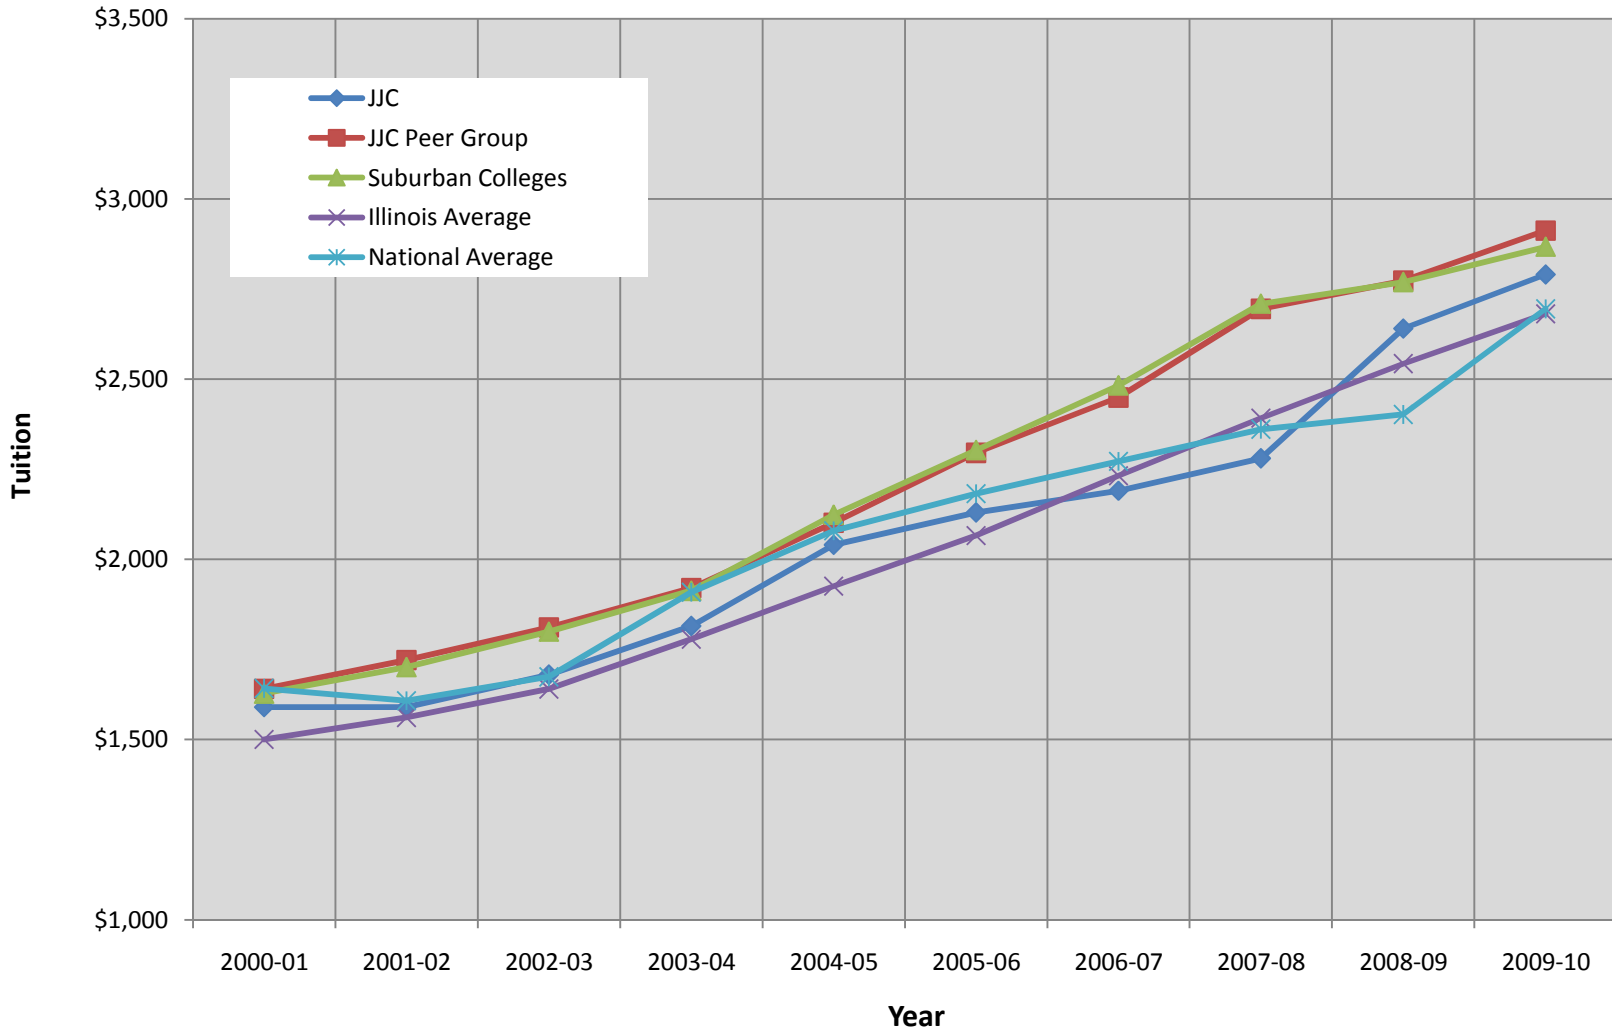

Tuition and fee information for all Illinois public and private institutions is listed in tables at the end of this document.
