Assessment Plan for Developmental Reading

Outcome: Students completing developmental reading will demonstrate an ability to comprehend college level material.

Rationale: Students who are unable to comprehend materials written at a college level will be unlikely to succeed in college.

Plan:
1. Students will be administered a standardized pre and post test for comprehension.
2. Students will be randomly selected from classes of all full time and some adjunct faculty.
3. This data will be collected for two semesters.
4. At the end of two semesters the data will be analyzed.
5. Based upon the results, any necessary changes may be made to the developmental reading curriculum and/or to the training of faculty.
