

A capital improvement project to replace the **T-Building roof** begins **Oct. 10**. Loud work to remove the roofing will occur at night between 10 p.m. and 6 a.m. to avoid disrupting classes. Installation of new roofing will occur during normal work hours and may result in minor noise and some odors associated with the work. Building ventilation equipment will be adjusted as much as possible to reduce transmission of odors. Equipment, cranes and materials will be staged near the southeast corner of the building. Please be aware of the contractor's activity, comply with barriers and warnings, and stay clear of the work area to allow the space required for your safety and the safe performance of the work. Thank you for your cooperation and patience.
