In evaluating the proposals submitted, JJC will apply the "Best Value" standard in selecting the supplier to be awarded a contract for this project. Purchase price is not the only criteria that will be used in the evaluation process. Any award resulting from this RFP will be made to that vendor whose offer conforms to the RFP and it is determined to be the most advantageous, of "best value" to JJC, in the sole judgment of JJC. The selection process will include, but not be limited to, the following considerations:

1. The provider's ability to assist JJC in meeting the overall goals and to reduce JJC administrative costs associated with the procurement process.
2. The quality and range of services the firm proposes to provide.
3. The extent to which the goods or services meet JJC needs.
4. The firm's overall experience, reputation, expertise, stability and financial responsibility.
5. The vendor's past relationship with JJC, if any.
6. The experience and qualifications of the staff that will be assigned to service JJC's account.

9. Vendor's financial terms offered to JJC.
10. Quality of the implementation plan.
11. Feedback from references.
12. Any other relevant factor that a private business entity would consider in selecting a qualified firm.

VII. SCOPE OF WORK

The engagement should be broken into two phases: 1) penetration testing (external, internal, and wireless) and 2) operational framework review. The bidder will provide pricing for each phase. JJC has the ability to award phases to multiple vendors, if deemed necessary.

Penetration Testing Phase

1. External pen-testing will be tested from an unauthorized perspective and performed completely external to JJC via the Internet with no specific network information provided to the vendor. The scope of this review is all Internet-accessible systems owned and
operated by JJC (No more than 50 publicly accessible services). The vendor should perform initial searches and scans to identify targets and potential vulnerabilities. Once vulnerabilities are identified, the vendor will validate the potential vulnerabilities and assess the risk associated with each.

2. Internal penetration assessment will be performed from inside the organization, mimicking an attacker with internal network access with no credentials. The approach will be the same as in the external penetration assessment and will include at least 10 class C IP ranges. Please provide the cost for 5 additional class C subnets in the event it is deemed necessary by JJC during the testing.

3. Wireless penetration assessment phase will be performed onsite at our Main Campus Location. The goal will be to identify wireless networks and validate security mechanisms in place to prevent unauthorized access through wireless networks. The scope for the wireless penetration test will include three separate wireless networks.

**Operational Framework Review Phase**

The goal in this phase is to learn enough about the JJC architecture, operational practices, security requirements, and overall technological agenda to provide insight into the best way to structure an organization-wide program for information security based on the NIST 800-53 standards and guidelines. See deliverables section below for more details.

**Deliverables**

At the conclusion of the assessment, JJC requires written documentation of the approach, findings, and recommendations associated with this project. The final reports will be the master documents encompassing all of the firm’s work and findings. Operational framework findings and recommended remediation(s) should be referenced to specific NIST SP 800-53 controls (families) and assigned a risk level. Penetration test findings should be evaluated using a risk based approached and presented in a fashion that identifies key risk to the overall organization. A formal presentation of the findings and recommendations to senior management will also be required. The documentation should consist of the following:

- **EXECUTIVE SUMMARY REPORT**: A document developed to summarize the scope, approach, findings and recommendations, in a manner suitable for senior management and the Information Security Office. Short-term recommendations, as well as strategic long-term recommendations to improve the efficiency and effectiveness of JJC’s information security program should also be included within the report.

- **DETAILED TECHNICAL REPORT**: A document developed for the use of JJC technical staff which discusses: the methodology employed, positive security aspects identified, detailed technical vulnerability findings, an assignment of a risk rating for each vulnerability, supporting detailed exhibits for vulnerabilities when appropriate, and detailed technical remediation steps.

To make a fair and equitable comparison, all proposals must address the following:

1. General information including your firm’s office location(s), contact numbers, history, and length of time in business
2. Experience as an Information Security Audit and Penetration Testing Vendor

3. Reference Clients(3-5): (Company Name, Contact Name, Phone number and e-mail)

4. Scope, Approach, and Methodology, along with a sample report that has been cleansed (no previous client information)

5. Proposed Project Staffing

6. What type of tools will be used to support the assessment?

**QUANTITY**

There is no guaranteed amount of services intended either expressly or implied, to be purchased or, contracted for by JJC. However the supplier awarded the contract shall furnish all required services to JJC at the stated price, when and if required.

**PROPOSED PRICING**

The vendor should furnish a list of proposed prices for all services and materials to be used during the term of the contract. The list of proposed prices should be structured, for each phase, to allow for the calculation of unit cost analyses. The prices included herein are to be firm through the contract term, unless noted otherwise by the vendor. JJC has the ability to award phases to multiple vendors, if deemed necessary.
CERTIFICATION OF CONTRACT/BIDDER

The below signed contractor/bidder hereby certifies that it is not barred from bidding on this or any other contract due to any violation of either Section 33E-3 or 33E-4 of Article 33E, Public Contracts, of the Illinois Criminal Code of 1961, as amended.
